

Heatmap visualization showing the expression of 40 transcription factors (TFs) across 6 conditions (Hf03\_TN, Hf04\_TN, Hf03\_CM, Hf04\_CM, Hf03\_EM, Hf04\_EM). The color scale ranges from -2 (blue) to 2 (red). The TFs are listed on the right, and the conditions are listed at the top. A dendrogram on the left shows the hierarchical clustering of the TFs. A color bar at the top indicates the cell types (TN, CM, EM) for each condition.
